

## The Worlds 1<sup>st</sup> browser VoIP Phone with Real Tel No's & nothing to download

- Become a Virtual Operator and broadcast live multimedia messages to your customers!

VePhone is a new service from Group 3 Technology offering VoIP phone calls from a web-browser. Users can access the service from YOUR website enabling YOU to become a Virtual VoIP Operator instantly. Furthermore, VePhone contains a facility for broadcasting live multi-media messages directly to users screens, enabling you to generate extra revenue from sponsored messages and additional services such as IPTV or videos.

### VePhone: Simple for Your Customer & Simple for You

Your customers access VoIP Service from your website and can use VePhone to make unlimited free calls on the internet. They get a real telephone line too—a second line they can use anywhere in the world. You control the live content appearing on-screen to all your Customers logged in to the VoIP Phone.

*Control Panel enables you to easily manage sponsored messages and multi-media content*

### VePhone heralds a new era for online communication

- ◆ Offer Your Customers a leading edge new VoIP service
- ◆ Retain Customers by offering every user a Real UK Telephone Number
- ◆ Attract New customers and increase web traffic
- ◆ Instantly control and change live adverts and content
- ◆ Low-cost and simple to use
- ◆ Fast rollout

### Display multi-media content to your customers ...

Use the display areas to sell new services, promote special offers or even broadcast IPTV!

### Becoming a Virtual Operator is simple ..

By adding a "Login" and "Signup" button to your website you'll become a virtual VoIP operator, with none of the high financial risk of alternate technologies. Your customers get a service that keeps them coming back to your website and a real telephone number increasing their loyalty. You retain complete control of the live content and can increase your online profile and revenues significantly.

G3T provide:-

- A fully operational and robust VoIP network for your customers to make phone calls
- A simple to use Partner Control Panel to administer live content/sponsored messages
- Full connection to landline and mobile PSTN with UK and International phone numbers
- Secure user pre-pay payment facilities and account facilities
- High quality, secure free calls between users anywhere in the world
